Title: Wildlife conservation

Introduction:

There are international **animal conservation groups** dedicated to **protecting endangered species**, **conserving habitats**, and **addressing climate change**. They tackle various environmental issues such as deforestation, overfishing, and pollution. These organisations **promote sustainable development** and advocate for policy changes to address these challenges. They conduct research, support local community actions, and emphasise the importance of **preserving biodiversity**. Their work aims to promote a sustainable future for our planet.

Here are some examples of international animal conservation groups:

1. **World Wildlife Fund (WWF)**

<https://www.worldwildlife.org/>

2. **Greenpeace**

<https://www.greenpeace.org/>

3. **Conservation International**

<https://www.conservation.org/>

4. **Friends of the Earth**

<https://www.foei.org/>

5. **Sierra Club (United States)**

<https://www.sierraclub.org/>

6. **Defend the Wild (Australia)**
