Hong Kong's Got Talent!

In recent years, several Hong Kong children have been admitted by local universities to their undergraduate programmes. The press is concerned about their studies and school life at university rather than the dreams of these Hong Kong young talents.

Cecilia Cheung is now 12 and has been admitted to the medicine school of one of the renowned universities in Hong Kong. Cecilia expects that she 1. **F** her medicine degree in five years. She plans to study paediatrics as she feels sad seeing children suffer from diseases. Cecilia thinks that she 2. **I** very hard then. After graduating from the university, she 3. **B** much and she 4. **J** about how to help the others. Cecilia also expects to work as a doctor in the remote villages in mainland China. After visiting mainland China, she 5. **A** many sick people there.

Another Hong Kong young genius is 10-year-old Bally Leung, who has special talent in Mathematics. He 6. **E** a Mathematics programme, which is specially designed for him by the Mathematics Department in the coming school year. Bally said that he loves doing Mathematics but he is also worried about his study at the university. As he 7. **H** with the other children, he 8. **D** bored. The professors of the university also notice this problem. By September, they 9. **C** different activities for Bally to enjoy his school life at university.

Cecilia and Bally are only two of the talents in Hong Kong. In the near future, more young talents 10. **G** to the society.
