

Answering Strategy

1. Text type and format – You are asked to complete a questionnaire after attending a summer programme. There is no fixed format for a questionnaire, but this one should be in paragraphs.
2. Genre – It is an evaluation giving feedback. You are expected to comment on the merits and demerit of the programme.
3. Language and formality – It is an evaluation for the centre's internal use so the tone can be straightforward and the language should not be too difficult, allowing the readers to grasp the main ideas easily. Meanwhile, be polite when making negative comments or suggesting improvement.
4. Organisation – One paragraph for each question. In each paragraph, start with a topic sentence briefly stating your opinions. Then, elaborate your opinions with your background and aspirations (for the first question) or the experiences you had in the programme (for the second and third questions).
5. Topic and vocabulary – The theme of this questionnaire is a summer course for secondary school students. You should have enough relevant ideas and vocabulary items for this topic. You can refer to the following ideas and vocabulary items.

Useful vocabulary items and expressions

Verbs / verb phrases

encompass	包括
get ahead	取得進展

Nouns / noun phrases

academic knowledge	學術知識
