Greeting	Good morning parents, teachers and fellow students.
Introduction	Today I am going to give a presentation on the topic—fashion. Fashion is an important part of people’s lives no matter how old they are. They change according to what country you live in and even in what part of that country you live in. However, it is always important to keep your own style.
Body	<p>In the past, there would be a particular style for everyone to follow. The late 1970s, for example, was the time when most of the young people were known as punks. However, nowadays, people do not focus on a particular style of clothing or hair very much. You can clothe yourself in a blouse and skirt of your own choice. The blouse may or may not have lace. Then you can choose a bracelet or necklace which goes well with your clothes. It is not the price that matters; your clothing and hair style should express your personal style.</p> <p>Walking along the streets of an urban area such as Causeway Bay, you can see that causal wear is now the major trend. The blend of colourful T-shirts and trousers along with causal shoes are common.</p>
Conclusion	The idea today is to create your own style or fashion. If you are a man, maybe a beard or moustache looks good on your face. A woman can pick her favourite colour of lipstick or choose not to wear any makeup at all. She can wear whatever type of dress, shorts or jeans she likes. Never forget that you are your own fashion statement. Just be yourself! Thank you!
