

Writing Sample 

Greeting	Dear Editor,
Opening paragraph	I am writing to give my opinion about the problem of global warming and what we should do before it is too late.
Body	<p>Most people around the world believe that the weather is changing and scientists nowadays believe that weather changes can take less time than before. Moreover, conflicting and worrisome discoveries have been made in recent years, making scientists fear for the future of humankind. Changes in global temperatures and global climate affect transportation and crops etc. In fact, those changes can affect people's lives around the world in ways beyond our imagination.</p> <p>The global warming or greenhouse effect is getting higher and higher, thanks to our burning oil and other materials. However, one curious finding is that the Antarctica, the coldest place on Earth, is getting colder. On the other hand, the world's overall temperature is getting higher, and the temperature of this year is the highest on record. This will only cause more floods and droughts.</p>
Closing paragraph	However, the warming can be decreased or at least slowed down if we use our power more wisely and more careful in consumption. Should the government implement more laws to protect the Earth, it will be much better.
Close	<p>Yours faithfully,</p> <p>Charles</p> <p>Charles Tam</p>
